

M'AKOLA MAJOR CAPITAL PROJECTS

300 ROBRON ROAD
UNIT RENOVATION AND SELECT EXTERIOR
RENEWAL PROJECT

ROBRON ROAD, CAMPBELL RIVER

While future plans are reviewed for Robron over the next several years, Assets is proud to announce M'akola renovated the interior of the units at the complex to increase tenant comfort and health/safety, as well as completed exterior repairs.

Interior upgrades included new flooring, paint, counters and cabinets, faucets/sinks/vanities, lighting, tub surrounds, vent exhausts, doors, appliances, and more. Exterior renewals included fencing and siding repairs, railing replacement, landscaping, new thresholds, exterior vents and unit numbering, etc.

We also replaced the cladding at the regional site office and the onsite community building/daycare. The building is now used by community organizations and local programs for children.
